

EPA National Database Highlights

GWPC Annual Meeting

Atlanta, GA
September 26-28, 2011

Ann Codrington – Acting Division Director,
Drinking Water Protection Division

National Database Developments

The National UIC Data Base is a nationally consistent set of well specific data useful for:

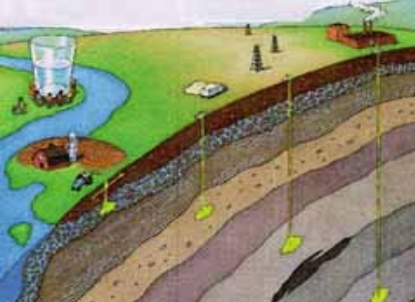

- Regional oversight
- HQ trends analysis
- Funding allocation
- Improving state data capabilities
- Establishing consistent metrics for UIC activities
- Demonstrating UIC work load and responsibilities to justify meaningful funding increases

UIC DB Progress To Date

EPA is engaged with 40 of the 69 UIC State and Regional DI in working to flow data to EPA DB

- **26 UIC Programs Submitting Data to UIC DB**
- 23 programs submitting data quarterly
- 3 programs submitted in test server, awaiting production subm (NB & UT CI 2, Fort Peck,
- 5 of 26 programs have transitioned to e-reporting, 7 others are in final stages of transition
- **14 UIC Programs preparing to flow data**
- **29 programs not yet engaged**

Finishing the Job

Populating UICDB is National Program Priority
Significant progress expected in FY 2012 and FY 2013

GWPC Attention Needed:

- Promote involvement in flowing data to UIC DB by 29 states not currently engaged
- Provide tech support to states currently mapping their data, particularly Class 2 RBDMS states
- EPA Exchange Network grants aps due NOV 4
 - More than \$ 2M invested in UIC data flow
 - UIC DB a priority 1 data flow for EPA
 - 2012 grant cycle may be last year of program
